

ENVIRONMENTAL POLICY

At **BYTE CONSTRUCT**, a commitment to the environment is part of our core business which includes Design, Construction and Interior fit-out services for the Commercial and Industrial Sectors.

BYTE CONSTRUCT as an organisation, we realise the acute need for environmental responsibility in our industry. Green Development is not some new transient whim; it is the pathway to the future. In fact, it is the only certain way to ensure that future.

The environment comprises not only the earth, air and water but also the quality of life to the people, plants and animals that depend on it in the long term. At **BYTE CONSTRUCT**, we aim for a positive environmental impact and the responsibility for us translates to response ability. This is achieved by understanding the environmental aspects we are exposed to on each project and implementing mitigation strategies to limit our imp

BYTE CONSTRUCT is committed to adopting and maintaining sound environmental management and operating practices, commitment to compliance with legal and other requirements and for continual improvement of environmental performance throughout the company.

Accordingly, **BYTE CONSTRUCT** adopts the following four key environmental guiding principles which go beyond minimum regulatory compliance:

1. Deliver a sustainable quality of life;
2. Conserve finite resources;
3. Protect biodiversity;
4. Setting up measurable objectives and targets with the aim of preventing and controlling pollution and eliminating environmental incidents in relation to our activities, products and services; and

To ensure that environmental protection is effectively managed all **BYTE CONSTRUCT** personnel and sub contractors are encouraged to be personally involved in the ongoing improvement of the management system by identifying environmental issues in the workplace, and by providing suggestions for their management.

BYTE CONSTRUCT identifies the nature and scale of risks associated with its operations through its risk assessment & mitigation processes.

The **BYTE CONSTRUCT** Environmental Management System also provides the framework for setting and reviewing environmental objectives and targets.
